

## Indigo Condominium – Estimated Condominium Square Footage (For Informational Purposes Only)

The square footage numbers listed below are defined by the condominium parametrical boundaries (the inside surface of the outer wall perimeter of the condominium) also referenced as “paint to paint”, “heated and cooled square footage” or the “condominium method” and were provided by the Association’s engineer as a part of the litigation related to the method of calculating square footage in the Declaration of Condominium for Indigo, as amended. These numbers **ARE NOT** used for the purposes of calculating fractional share. The numbers are for information only and provided as a convenience to Unit Owners. The numbers are not an official representation of the square footage by the Association and if used, they are used entirely at your own risk as to accuracy.
